

## What Should I Do If My Alarm System Says SYSTEM LO BAT?

If your Honeywell or Resideo alarm system is beeping with a low battery, you're not alone. This is a common issue that many homeowners experience.

How can I clear an alarm system low battery? The error message "System Lo Bat" message occurs when the battery inside the control panel has been drained due to a power failure or needs to be replaced. To clear the low battery message, wait 24 to 48 hours for the battery to recharge after a power failure or replace the battery inside the control panel if it's more than 3-4 years old.

All alarm systems get their primary power from a transformer that is plugged into an electrical outlet. A battery inside the control panel serves as a backup if you lose power.

During a power failure, your alarm system can run on the battery for about 6-24 hours, depending on the power requirements of your alarm system.

The backup battery is rechargeable and will be fully charged within 24 to 48 hours after the power is restored.

If you see the system low battery message after a power failure, wait for 24 to 48 hours before trying to replace the battery.

Once the battery is fully charged, the "SYSTEM LO BAT" should clear by itself. If the low battery message doesn't clear, you can disarm the system two times to reset the system.

To reset the low battery, enter your [4-digit code] + [1] two times

Like most batteries, the backup battery has a life span of only 4-5 years. An old battery won't be able to fully charge after a power failure.
